Sophos Secure Web Appliance

Have you completed your Weatec application?

If not, contact your deacon for an application before continuing

to setup this Weatec approved filter!

Who is it for?

Sophos Secure Web Appliance is a hardware solution for medium to large businesses. The Sophos device is installed in a network environment between the ISP modem and your internal network and will filter any device connected to the network.

Pros:
- One point of management for the whole network.
- Has the option on some models for Deep packet inspection
- Can enforce Google Safe Search

Cons:
- Price
- Requires network knowledge to set up.

Note: *After testing, Sophos Secure Wep Appliance has been approved as an acceptable content filter according to the requirements set forth in the Weaverland Conference Electronic Technology Usage Guidelines. Please remember that no filter can be guaranteed to filter out all objectionable content; therefore the Weatec Accountability Software must be installed on all devices in order to be in compliance with Weaverland Conference guidelines. The accountability software logs all web traffic, thus fostering brotherhood accountability. So even if objectionable content is missed by Sophos, the content will still trigger a flag on the accountability server. Use the Weaverland Conference template as a minimum; there is nothing preventing you from choosing stricter settings.*

How to Acquire

Find more details at https://www.sophos.com/. To ask questions, learn current pricing, or get started with Sophos, call 866-866-2802
Email: nasales@sophos.com , or contact page: https://www.sophos.com/en-us/company/contact.aspx#united-states
